**GENERAL DESCRIPTION:** Masterbatch for colouring polyethylene compound used in the production of electrical wires and cables. The recommended level of addition of masterbatch to polyethylene compound is 1%.

**COMPOSITION:** The masterbatch contains a mixture of pigments thoroughly dispersed in low density polyethylene (LDPE). No ultra violet (UV) stabilizers or anti-oxidants are included. The masterbatch is lead free.

**APPEARANCE:** Cylindrical shaped pellets with dimensions of approximately 2mm-4mm in diameter and approximately 2mm-4mm in length.

**COLOUR:** At 1% addition to typical polyethylene compound, the shade will be an approximate match to the RAL shade specified above, when viewed in controlled light.

**LIGHT STABILITY:** Test BS1006 A02C. This is not less than rating 6.

**HEAT STABILITY:** The minimum time for heat stability is 15 minutes at 200°C.

**DISPERSIBILITY:** The PPM masterbatch will disperse easily in polyethylene compound and no nibs or spots of undispersed pigment will be present.

**PACKAGING/LABELLING:** The masterbatch is packed in plastic bags, 25 Kg net weight and 20 x 25 Kg bags will be located on a pallet and shrink wrapped.

All bags will be identified on the side with a label detailing:

Product Code and Colour  
Batch No. and Bag No.  
Net Weight 25 Kg

**HEALTH & SAFETY CODE:** PPM1
